

## Dr. Yuri Gorfinkel Results

Dr. Yuri Gorfinkel - This name will forever associated with the SCENAR. To many SCENAR therapists he is a teacher, to a few he was a friend. And if we consider SCENAR World a living system, than Dr. Yuri was its heart and soul.

**This dedication opened the 4th digest "SCENAR therapy and SCENAR assessment" released in 1998 in Russia.**

On the 13 April 1998, on the 37th year of his life, death picked out the best. Y. V. Gorfinkel - one of the founders of SCENAR therapy, has left this world. He was born on 22nd July 1961. After graduation in 1984 at Rostov State Medical Institute (Rostov city) he was working as a medical doctor, on call for the emergency services. In June - December 1986 he took part in the liquidating of the Chernobyl catastrophe.

In 1988 he joined, as a SCENAR therapist, the Special Design Bureau RITM "Rhythm". In 1994 he became a consultant for SDB and a trainer and one of the founders of SCENAR therapy schools.

Dr. Yuri lived a short, but bright life. Being introduced to SCENAR therapy in 1986, he instantly recognized the great potential of this direction. He took part in the development of methodology of SCENAR as well as in designing of technical means. One of the modifications of the SCENAR was called 035-G.

Y. V. Gorfinkel was an initiator of the development of one of the versions of SCENAR - the "Prologue" device. Dr. Yuri was a pioneer in application of the device in emergency medicine, the author of the methods of the device use in a subjective mode, the use of small asymmetry, secondary factors, "the last feature" and various other approaches. The idea of "SCENAR-vaccination" and many other original ideas belong to him.

Dr. Yuri's involvement in the creation of a new direction in traditional medicine - SCENAR therapy, is unquestionable and hundreds of followers throughout the whole Russia and abroad, are carrying on his noble work.

A bright memory of Dr. Yuri Gorfinkel will live in our hearts forever.

On the following pages we offer you a summery of Dr. Yuri's experience as a SCENAR Specialist as he personally put it together and presented to Dr. Irina Kossovski, at her request, in January 1998, 3 months before his untimely death

Gorfinkel Yuri Victorovich, 1961-1998

P.S. Unfortunately, Dr. Yuri's list was not been completed and did not include some important areas of his experience (where Dr. Yuri also had excellent results), such as diseases of the nervous system, eye and skin diseases, stomatologic diseases and neoplasms, as well as endocrine and metabolic diseases, immune and mental disorders etc. However, lack of this information cannot affect the obvious general tendency and a picture of personal experience any health care professional would dream to achieve.
